About This Content

The Auto Clicker Pet is a ingame Pet which has the look of a little ice elemental which shoots bullets on the enemy. The bullets use the actual clicker damage which makes the pet to an auto clicker like function. The pet has 2 different modes in which it can follow the mouse or follow a specific path automatically on the battlefield.

Differences between ingame and DLC Pet:

Ingame Pet:

- Must be unlocked
- can be leveled
- a small little pet which follows a path on the battlefield

DLC Pet

- Is directly unlocked after purchase
- Has the Speed value of a lvl 5 ingame pet but cannot be leveled (ingame attack pets need a long time to unlock and level up but can get faster then the DLC pet)
- a bigger pet which can also follow a path or also follow the mouse.

why I cant play on my win7 computer\uff1f

when I launch the game the screen show pink color. "From World war I to beyond, a good start to battlegoat's alternative to paradox game types. Early Access though. Good tutorials.. I can't really say that this is a bad game, but I doubt it is worth you time, more like. The whole thing seems somewhat aimless, starting out in the forest, then an underground facility, then a mine, then another kind of cave system thing. None of it seems connected or relevant, and I doubt there is really any story. The game seems to enjoy taking a large slew of horror game tropes then sticks them all into one game for a mish mash that never seems to gell together. If they just stuck with the first story and expanded it into a full game, there could be some serious potential for it, because the first part is really solid. I may not have played much, but it is pretty hard to get myself into a game that doesn't seem to be into itself, especially not for \$13.. too many bugs...

1.when I buy item, item just banish with weapon.

of course I did not counfused buying with selling.

2.when I ride elevator, I can't click any floor so I must restart game.

good concept,

bad programming.. This game is nothing but a button masher. You can't use any skill against your opponent. You can only spam buttons and hope your attack will connect before theirs will because once that happens whoever is hit first will be in a stun lock until they die.

I saw two guys fighting to the death so I just sat there waiting for their health bars to go down then I went in spamming all the buttons and got the kills for both of them. Nothing they could do about it.

It's a nice idea but the gameplay is terrible. ---{Graphics}---

\u2610 The game itself is a big terrarium for bugs. nice simple game, good for filling a little time. Biggest 2 issues are, the combat is a bit off, in the tunnels I found even though right on top the creature, sword still did not hit. Other issue, its too short, finihsed a bit to soon, needs more dungeons.

Quite nice game not only for Arkanoid fans. It has good sense of humor and gameplay is very nice. Challenging for an arkanoid type game. If you don't treat death and games seriously it is a game for you!. So, originally when I purchased this product, it was fun and lively. There were plenty of jokes, and in general it was pretty interesting and involved. I disappeared from the game for a year and recently started it up again. I was super excited to play the game and relearn the mechanics, I even bought the game for two friends so they could play as well. The game is pretty fun besides glitches and some minor issues, the problem lies with the community. I am about to delete the game permanently from my computer.

When I first hopped on, I noticed dwindling numbers. I continued to play and invited my friends to join with their copy. I started a few games with my friends and immediately noticed how toxic the community has become. If you ever want to start out in this game, you will be immediately flamed and reported from salty players. I can't recommend this game anymore, my friends refuse to play it with how bad the community is. It's become so bad and hateful that it seems tedious to even get on. Unfortunately, this is my first negative review, I can't recommend this to anyone with the way the community acts.. Fun little time waster. If you are looking to kill a few minutes, this is a good place to do it.. **WORST HORROR GAME EVER..** Beautiful game and hack n slash gameplay that i like. Unfortunately for english players, it's entirely in chinese. I googled a bit for anything about an english patch, official or not, and nothing. Only a promise from the CEO of the company that there **WILL** be an english version, but those news were from december 2018. I'm debating wether i should trust that and keep the game or just refund it because to me, it's unplayable right now. If anyone got some info on that official english patch i'd like to hear it!. A very solid JRPG that I enjoyed quite bit. Good story? Check. Good cast? Check. Good RPG mechanics and battle system? Check. Only flaws are dungeons can drag on quite bit and map design is all over the place with excessive clutter. The game was still very easy even on hard difficulty except for last boss and optional arena fight.. Nice concept but so harddddddd. Been following the development of this game since Dark-1 presented the game on the globalgamejam few years ago, its really a different game since then in a positive way. I just bought it and have only 20 minutes in the game, but for now I think it is a really interesting concept - gameplay wise, awesome soundtrack (they should sell as separate dlc\ost caz its really good), great art and animation. It's really hard, but challenging, it reminds me of super meat boy in that way. You should definitely try it out!

(I might update this review when I pump up the play time numbers). I do recommend this game but only if you really like Halloween, have lots of patience with puzzles, don't mind mixed quality graphics and sound, and can purchase the game for 5 dollars or less. Worse parts were the boy's voice and the ending. Best part was all the cool Halloween related scenes.. The resolution is absolutely horrible, and look like blurry\u2665\u2665\u2665\u2665\u2665\u2665. The controls are horrible, since you're auto-moving, and only have a jetpack, and rockets. The menu is a giant mess. God knows what all these demented icons are supposed to be.

The gameplay is also craptastic.

At least I paid less than \$1 for this garbage.
